ADEYEMI GBENGA

PROFILE

An adaptable and responsible web developer seeking for an internship or a developer position.

My creative experience in the fashion industry and my volunteer job as a frontend-developer have provided me with a well-rounded background and enabled me to develop an analytical/logical approach to tasks, software skills, and the ability to work under pressure.

In short, I am reliable, hard-working with strong attention to detail and eager to learn about new technologies.

I am able to work well both on my own initiative and as part of a team as well as to travel abroad.

SKILLS

Check out the technology stack I am conversant with.

Key skills include:

- **Frontend Technologies:** Javascript, React/Redux, Html5, Css3, Sass, Bootstrap
- **Backend Technologies:** Nodejs, Deployment, Socket-io, ExpressJS, firebase
- **Database:** Mongodb, MySQL,

EXPERIENCE

Baronial ventures, Lagos— *Software developer, team leader and project coordinator*

MONTH 20XX – PRESENT

- Lead and execute all phases of event planning and production spanning committee recruitment, training, vendor relationships and on-site facilitation.
- Brought new business to the organization through relentless networking and stewardship
- Developed and Implemented project scope design-develop-deploy process.
- Collaborated with UX designers and backend developers and ensured coherence between them.

Moschino, Kogi— *Fashion designer*

APRIL 2016 – APRIL 2018

- Assisted with design process from start to finish including concept, design, presentation boards, and line sheets
- Adhered to strict project deadlines, according to design and production calendar

Personal Projects, Location – *Fullstack developer*

SEPT 2020 – PRESENT

- Developed a full-stack web application, "Medi", using React that allows users to explore various aspects of meditation. User's progress is stored on a backend created using Node and MongoDB.
- Developing a digital business card platform, "Qwikerr". React was used to create the front end components while Node and Mongo were used to create a backend that stores user data and generates qr codes.
- Developing a e-learning platform, "Tutorhub", this app enables tutors to connect with students React was used to develop the front end which includes real-time chat, drag and drop and a variety of advanced features. The backend, built using Node, Express, and Mongo, takes advantage of well-developed RESTful API, Geospatial searching, and user authentication with JWT.
